EXECUTIVE SUMMARY – ENGLISH

Treasury Metals Inc. (“Treasury”) is proposing the construction, operation, decommissioning and abandonment of an open-pit and underground gold mine and associated infrastructure. The Goliath Gold Project (Project)—located 20 kilometres (km) east of the City of Dryden, Ontario—will have an anticipated mine and mill life of 13 years. Over the 13 years of operations, the average ore production and ore input capacity of the mine and mill would be 6,460 tonnes per day.

Treasury received a Federal government Decision Statement for the Project under the *Canadian Environmental Assessment Act, 2012* (CEAA, 2012) on August 19, 2019 (Decision Statement), with the Minister of Environment and Climate Change Canada concluding that with the implementation of mitigation measures, the Project is not likely to cause significant adverse environmental effects referred to in subsection 5(1) CEAA, 2012.

As of June 30, 2023, Treasury had not announced a formal decision to advance the Goliath Gold Project. As such, the Project remains in the evaluation (design and planning) phase.

As per Condition 2.9, Treasury is required to prepare an annual report each reporting year (defined in the Decision Statement as July 1 to June 30) commencing the reporting year the decision statement was issued. As per Condition 2.10, Treasury has until 31 October following the reporting year to issue the report.

The purpose of this report is to satisfy Conditions 2.9 and 2.10 of the Decision Statement. It contains a project update, Treasury’s approach to compliance management, an update on follow-up and adaptive management programs, the compliance status of federal decision statement commitments and a summary of key consultation and engagement activities.

SOMMAIRE EXÉCUTIF – FRANÇAIS

Treasury Metals Inc. (Treasury) propose de construire, exploiter, désaffecter et abandonner une mine d'or à ciel ouvert et souterraine ainsi que les infrastructures associées. Le projet aurifère Goliath (projet)—situé à 20 kilomètres (km) à l'est de la ville de Dryden, en Ontario—aura une durée de vie prévue de 13 ans pour la mine et l'usine. Au cours des 13 années d'exploitation, la production moyenne de minerai et la capacité d'entrée de minerai de la mine et de l'usine seraient de 6 460 tonnes par jour.

Le 19 août 2019, Treasury a reçu une déclaration de décision du gouvernement fédéral concernant le projet en vertu de la *Loi canadienne sur l'évaluation environnementale* (2012) (LCEE, 2012). Le ministre de l'Environnement et du Changement climatique du Canada a conclu qu'avec la mise en œuvre de mesures d'atténuation, le projet n'est pas susceptible d'entraîner des effets environnementaux négatifs significatifs visés au paragraphe 5(1) de la LCEE, 2012.

Au 30 juin 2023, Treasury n'avait pas annoncé de décision formelle pour faire avancer le projet aurifère Goliath. Le projet reste donc en phase d'évaluation (conception et planification).

Conformément à la condition 2.9, Treasury est tenu de préparer un rapport annuel pour chaque année de déclaration (définie dans la déclaration de décision comme allant du 1^{er} juillet au 30 juin) à compter de l'année de déclaration au cours de laquelle la déclaration de décision a été émise. Conformément à la condition 2.10, Treasury a jusqu'au 31 octobre suivant l'année de déclaration pour publier le rapport.

Le but du présent rapport est de satisfaire aux conditions 2.9 et 2.10 de la déclaration de décision. Il contient une mise à jour du projet, l'approche de Treasury en matière de gestion de la conformité, une mise à jour des programmes de suivi et de gestion adaptative, l'état de conformité aux engagements de la déclaration de décision fédérale, ainsi qu'un résumé des principales activités de consultation et d'engagement.

1.0 INTRODUCTION

Treasury Metals Inc. (“Treasury”) is proposing the construction, operation, decommissioning, and abandonment of an open-pit and underground gold mine and associated infrastructure. The Goliath Gold Project (Project) —located 20 kilometres (km) east of the City of Dryden, Ontario —will have an anticipated mine and mill life of 13 years. Over the 13 years of operations, the average ore production and ore input capacity of the mine and mill would be 6,460 tonnes per day. The regional location of the Project is shown on Figure 1.

Treasury received a Federal government Decision Statement for the Project under the *Canadian Environmental Assessment Act, 2012* (CEAA, 2012) on August 19, 2019 (Decision Statement), with the Minister of Environment and Climate Change Canada concluding that with the implementation of mitigation measures, the Project is not likely to cause significant adverse environmental effects referred to in subsection 5(1) CEAA, 2012. The Minister’s Decision Statement also established conditions in relation to the environmental effects, which must be complied with in order to advance the Project. Treasury is aware of the legal requirements and commitments made during the Environmental Assessment (EA) process and will ensure their implementation in a careful and precautionary manner. The EA Project Study Area is shown on Figure 3.

As of June 30, 2023, Treasury had not announced a formal decision to advance the Goliath Gold Project. As such, the Project remains in the evaluation (design and planning) phase. The follow-up programs required as per conditions 3.13, 3.14, 3.15, 4.5, 4.6, 4.7, 5.2, 5.3, 6.8, 6.9, 7.3, 7.4, and 7.5 are scheduled for development and implementation once the project has moved past the evaluation phase, and into the pre-construction phase.

As per Condition 2.9, Treasury is required to prepare an annual report each reporting year (defined in the Decision Statement as July 1 to June 30) commencing the reporting year the decision statement was issued. As per Condition 2.10, Treasury has until 31 October following the reporting year to issue the report.

2.0 REPORT SCOPE AND REQUIREMENTS

The scope of this Annual Report is to outline how Treasury has complied with the conditions of the Decision Statement. This report covers the Project activities undertaken by Treasury during the cumulative reporting period, January 1, 2023 to June 30, 2023, inclusive (herein referred to as the “reporting period”).

Condition 2.9 of the Decision Statement outlines the Annual Report information requirements for the Project. *Table 2-1* outlines the section references within this document that demonstrate concordance with these requirements.

Table 2-1: Annual Reporting Information Requirements and Treasury Concordance

Condition	Treasury Concordance
2.9: The Proponent shall, commencing in the reporting year during which the Minister issues the Decision Statement on the Designated Project, prepare an annual report that sets out:	
2.9.1: the activities undertaken by the Proponent in the reporting year to comply with each of the conditions set out in this Decision Statement;	Appendix A provides a list of all Decision Statement conditions and describes the activities undertaken by Treasury in the reporting period to comply with each condition.
2.9.2: how the Proponent complied with condition 2.1;	In addition to Appendix A, further information is provided in Section 4 (Approach to Compliance Management).
2.9.3: for conditions set out in this Decision Statement for which consultation is a requirement, how the Proponent considered any views and information that the Proponent received during or as a result of the consultation;	In addition to Appendix A, further information is provided in Section 5 (Consultation and Engagement).
2.9.4: the information referred to in conditions 2.4 and 2.5 for each follow-up program;	In addition to Appendix A, further information is provided in Section 6 (Follow-Up and Adaptive Management).
2.9.5: the results of the follow-up program requirements identified in conditions 3.13, 3.14, 3.15, 4.5, 4.6, 4.7, 5.2, 5.3, 6.8, 6.9, 7.3, 7.4, and 7.5;	In addition to Appendix A, further information is provided in Section 6 (Follow-Up and Adaptive Management).
2.9.6: any modified or additional mitigation measures implemented or proposed to be implemented by the Proponent, as determined under condition 2.7; and	In addition to Appendix A, further information is provided in Section 6 (Follow-Up and Adaptive Management).
2.9.7: any change(s) to the Designated Project in the reporting year for which the Proponent determined that condition 2.15 did not apply.	In addition to Appendix A, further information is provided in Section 3 (Project Update).

3.0 PROJECT UPDATE

This section provides a general update on the design and planning phase activities undertaken for the Project during the reporting period. The overall implementation schedule has been included to provide context for scope of this report and compliance reporting timeframes.

On March 27, 2023, Treasury filed the “Goliath Gold Complex – NI 43-101 Technical Report and Prefeasibility Study” (the “PFS”). Post-PFS, Treasury has focused on advancing value-engineering to support long-lead provincial permitting and moving toward the commencement of a Feasibility Study (FS). Advancing technical engineering activities continues to move Treasury towards its goal of a positive construction decision from the Treasury Board of Directors, prior to advancing potential development at the project. Ongoing environmental programs complement work completed for baseline studies and will be used to support permitting processes at federal and provincial levels.

As of June 30, 2023, Treasury continues to advance technical engineering activities, and is working towards the commencement of a Feasibility Study.

Table 3-1: Project Milestones

Project Phase	Start Date	Completion Date ¹	Duration ¹
Design and Planning – PFS	August 2019	March 2023	3.5 years
Design and Planning – Value Engineering	H1 2023	H2 2024	1 year
Design and Planning – FS	H1 2024	H1 2025	1 year

Closure	2041	—	—
Decommissioning ³	2041	2043	2 years
Closure ⁴ and Site Close Out ⁵	2043	2073	30 years
¹ Completion dates and durations are approximate and are subject to change and will be based on monitoring results and direction from regulatory authorities. ² H1 refers to January through June; H2 refers to July through December. ³ Decommissioning: Demolition and major site rehabilitation activities; pumping and monitoring activities implemented. ⁴ Closure: The open pit is allowed to flood; pumping and monitoring activities implemented ⁵ Close Out: Commences once the open pit is flooded and passively discharges to Blackwater Creek.			

4.0 APPROACH TO COMPLIANCE MANAGEMENT

This section is to outline how Treasury will approach the monitoring and maintenance of Project compliance with regulatory requirements and commitments during the reporting period, and provides information on how Treasury is maintaining compliance with Condition 2.1:

The Proponent shall ensure that its actions in meeting the conditions set out in this Decision Statement during all phases of the Designated Project are considered in a careful and precautionary manner, promote sustainable development, are informed by the best information and knowledge available at the time the Proponent takes action, including community and Indigenous traditional knowledge, are based on methods and models that are recognized by standard-setting bodies, are undertaken by qualified individuals, and have applied the best available economically and technically feasible technologies.

Treasury continues to design and advance engineering details related to the Project in a manner that aligns with the Company's corporate standards and policies. Treasury considers and incorporates the expertise of a team of qualified engineering and environmental consultants to support ongoing engineering and ongoing engagement with Indigenous communities.

Treasury is committed to continued compliance with the provisions of the Decision Statement throughout all Project phases. Treasury has begun preliminary development of an environmental management system with the aim of ensuring that EA, permit conditions and other commitments are implemented effectively.

5.0 CONSULTATION AND ENGAGEMENT

Refer to Appendix B for a summary of key consultation and engagement activities undertaken during the reporting period.

6.0 FOLLOW-UP AND ADAPTIVE MANAGEMENT

This section provides a summary of activities undertaken during the reporting period related to the follow-up programs required by Conditions 3 (3.13, 3.14, 3.15), 4 (4.5, 4.6, 4.7) 5(5.2, 5.3), 6 (6.8, 6.9) and 7 (7.3, 7.4, and 7.5).

6.1 Fish and Fish Habitat

This condition is not currently applicable. Follow-up programs are scheduled for development and implementation prior to construction.

6.2 Migratory Birds

This condition is not currently applicable. Follow-up programs are scheduled for development and implementation prior to construction.

6.3 Wetlands

This condition is not currently applicable. Follow-up programs are scheduled for development and implementation prior to construction.

6.4 Land and Resource Use for Traditional Purposes

This condition is not currently applicable. Follow-up programs are scheduled for development and implementation prior to construction.

6.5 Health of Indigenous Peoples

This condition is not currently applicable. Follow-up programs are scheduled for development and implementation prior to construction.

7.0 CLOSING

Following the completion of the PFS, Treasury is currently in the process of completing value-engineering studies for the Project and anticipates advancing to a FS and positive construction decision by the Treasury Board of Directors. At this stage, the Project continues to be in the evaluation stage with ongoing environmental programs to complement baseline studies and support permitting process.
