RE: Magino Gold Project, Federal EA Decision Statement Conditions 9.1 & 9.2 Submission

Dear Mr. Carl Johansson,

Pursuant to the Federal EA Decision Statement regarding the Magino Gold Project please find enclosed Schedules 9.1 & 9.2. The parent company of Prodigy Gold; Argonaut Gold, announced on October 14, 2020 that the project has received Board of Directors approval to proceed to construction and we are therefore providing the required Schedules 60 days in advance of the estimated project construction start date.

Schedule 9.1: *'Proponent shall submit to the Agency a schedule for all conditions set out in this Decision Statement no later than 60 days prior to the start of construction. This schedule shall detail all activities planned to fulfill each condition set out in this Decision Statement and the commencement and estimated completion month(s) and year(s) for each of these activities.'*

Schedule 9.2: *'Proponent shall submit to the Agency a schedule outlining all activities required to carry out all phases of the Designated Project no later than 60 days prior to the start of construction. The schedule shall indicate the commencement and estimated completion month(s) and year(s) and duration of each of these activities.'*

As construction work involves working outdoors under variable weather conditions, we anticipate changes to the schedules provided will occur naturally through time and as the mine plan adjusts to both naturally changing geology and market conditions. Changes to the attached Schedules will be updated as part of the Annual Report. The attached Schedules are simultaneously being provided to each of the Indigenous communities associated with the project as required by EA Decision Statement section 9.5.

During the on-going COVID19 pandemic, we as a company are working hard to ensure the continued health and safety of our communities, staff and contractors. Please do not hesitate to contact the undersigned if you have any questions at all.

Sincerely,

<Original signed by>

IAAC	Impact Assessment Agency of Canada ('the Agency'; formerly Canadian Environmental Assessment Agency/CEAA)

1. INTRODUCTION

The following table is submitted to the Impact Assessment Agency of Canada (IAAC) in fulfilment of Condition 9.1 in the Decision Statement for the Magino Gold Project issued January 2019. Condition 9.1 states:

“The Proponent shall submit to the Agency a schedule for all conditions set out in this Decision Statement no later than 60 days prior to the start of construction. This schedule shall detail all activities planned to fulfill each condition set out in this Decision Statement and the commencement and estimated completion month(s) and year(s) for each of these activities.”

This schedule is valid as of October 19, 2020. The schedule assumes a construction start date on or about December 15, 2020. Activities that began before the issuance of the Decision Statement have been shown as commencing at the time of the Decision Statement. Please see Table 1 for a summary of key anticipated milestone dates for the Project. The commencement and completion dates are based on the current work plan but subject to operational factors that may result in changes to the estimated dates.

Table 2 below has transposed the Environmental Assessment (EA) conditions, and added columns for commencement, completion, and ‘relevant notes.

In future, this table and any associated updates can be incorporated into the 2020 Annual Report to IAAC (due March 2021).

Table 1: Schedule of Key Project Milestones

Project Phase	Estimated Duration	Years
Construction	3 years; includes 1 year of site preparation, 2 years of construction	December 2020 – December 2021 (site preparation); January 2022-December 2023 (construction)
Operation	15 years	January 2024 – December 2038
Decommissioning (i.e., Active Closure)	3 years	January 2039 – December 2041
Abandonment (i.e., Post-Closure)	50 years; includes 7 years of Active Monitoring until closure objectives are satisfied (in addition to Active Monitoring undertaken during Decommissioning) followed by Passive Abandonment	January 2042 – December 2048 (Active Monitoring); January 2042-December 2091 (full Abandonment including Passive Abandonment)

2. MAGINO PROJECT DECISION STATEMENT CONDITION IMPLEMENTATION SCHEDULE

LIST OF ACRONYMS

EA Environmental Assessment

1. INTRODUCTION

The following table is submitted to the Impact Assessment Agency of Canada in fulfilment of Condition 9.2 in the Decision Statement for the Magino Gold Project issued January 2019. Condition 9.2 states:

“The Proponent shall submit to the Agency a schedule outlining all activities required to carry out all phases of the Designated Project no later than 60 days prior to the start of construction. The schedule shall indicate the commencement and estimated completion month(s) and year(s) and duration of each of these activities.”

This schedule is valid as of October 19, 2020. The schedule assumes a construction start date on or about December 15, 2020. Activities that began before the issuance of the Decision Statement have been shown as commencing at the time of the Decision Statement. Please see Table 1 for a summary of key anticipated milestone dates for the Project.

Table 2 below has transposed the activities from Section 2.3, Table 2.2 (p. 15-16) of the Environmental Assessment (EA) report, and added columns for commencement, completion, duration, and ‘relevant notes. The commencement and completion dates, as well as duration are based on the current work plan but subject to operational factors.

Table 1: Schedule of Key Project Milestones

Project Phase	Estimated Duration	Years
Construction	3 years; includes 1 year of site preparation, 2 years of construction	December 2020 – December 2021 (site preparation); January 2022-December 2023 (construction)
Operation	15 years	January 2024 – December 2038
Decommissioning (i.e., Active Closure)	3 years	January 2039 – December 2041
Abandonment (i.e., Post-Closure)	50 years; includes 7 years of Active Monitoring until closure objectives are satisfied (in addition to Active Monitoring undertaken during Decommissioning) followed by Passive Abandonment	January 2042 – December 2048 (Active Monitoring); January 2042-December 2091 (full Abandonment including Passive Abandonment)

2. MAGINO PROJECT SCHEDULE OF ALL ACTIVITIES FOR ALL PROJECT PHASES

Table 2: Magino Project Schedule of All Activities for All Project Phases – EA Condition 9.2

Magino Project Schedule of All Activities for All Project Phases – EA Condition 9.2					
Activity		Commencement Date (Month, Year)	Completion Date (Month, Year)	Duration	Relevant Notes
#	Description				
Construction (3 years – December 2020 to December 2023)					
1	Clearing, grubbing and site grading required for the construction of the following project components:	January 2021	August 2021	8 months	
2	the open pit;	January 2021	June 2021	7 months	
3	the tailings and mine rock management facilities and associated water management systems;	January 2021	May 2022	5 months	
4	the ore stockpile areas;	January 2021	August 2021	8 months	
5	processing plant area, including the ore stockpile, conveyor and all associated infrastructure, including reagent storage area and truck shop;	January 2021	August 2021	8 months	
6	the explosives storage area; and	January 2021	August 2021	8 months	
7	worker accommodation area.	January 2021	May 2021	5 months	
8	Building the public bypass road would be built with aggregate and overburden sourced from on-site material, and with side ditches and culverts at creek crossings. The public bypass road would be built to the grade of a primary forest road in accordance with Ontario Ministry of Natural Resources and	April 2021	Feb 2024	~3 years	There will be a temporary by-pass road in place while the permanent one is in construction

Magino Project Schedule of All Activities for All Project Phases – EA Condition 9.2					
Activity		Commencement Date (Month, Year)	Completion Date (Month, Year)	Duration	Relevant Notes
#	Description				
	Forestry guidance, and be subject to provincial approval under the <i>Provincial Lands Act</i> .				
9	Constructing of a drainage channel north of Water Body 10 to enhance flow and drainage.	April 2021	Nov 2022	~ 2 years	
10	Constructing of a channel to connect the outflow of Spring Lake to the lower reach of McVeigh Creek, south of the bypass road.	April 2021	Nov 2022	~ 2 years	
11	Decommissioning historical mine components (buildings, non-mine waste landfill, existing tailings management facility).	Jan 2021	Dec 2023	~ 3 years	Buildings decommissioning will start immediately as construction starts, historic tailings facility decommissioning will start as process plant is commissioned
12	Draining waterbodies to be overprinted by the project footprint, including Lovell Lake, Webb Lake, part of McVeigh Creek and tributaries, waterbodies 1, 2, 3, 4, 5 and 10.	Jan 2021	Sep 2024	~ 4 years	Webb lake will be the last lake to be drained
Operation (15 years –January 2023 to December 2038)					
13	Extracting ore from the open pit (this would occur over a 17-year period).	Feb 2021	Jan 2038	17 years	Includes pre-stripping
14	Drilling and blasting zones of rock,	Feb 2021	Jan 2038	17 years	

Magino Project Schedule of All Activities for All Project Phases – EA Condition 9.2					
Activity		Commencement Date (Month, Year)	Completion Date (Month, Year)	Duration	Relevant Notes
#	Description				
15	Removing the material and hauling it in trucks to the processing plant, stockpile areas and mine rock management facility,	Feb 2021	March 2040	19 years	
16	Dewatering the open pit.	Feb 2021	Jan 2038	17 Years	
17	Stockpiling of overburden, low-grade ore and waste rock.	Feb 2021	Jan 2038	17 Years	
18	Storing and using of explosives.	Feb 2021	Jan 2038	17 Years	
19	Processing ore (up to 15 years): Raw ore material extracted from the open pit or transferred from the ore stockpile will be processed through a crusher and a grinding circuit. A leaching and refining process would finely grind the ore and extract gold using cyanide and other reagents. Smelting to produce gold doré would then occur following the use of an electro- winning circuit.	Jan 2023	March 2040	18 Years	
20	Water-taking from Goudreau Lake to supply potable and process water.	June 2022	March 2040	19 Years	
21	Managing mine water (effluent, runoff and seepage) and sewage.	Feb 2021	March 2040	19 years	
22	Operating roads including mine haul and service roads, potable and process water infrastructure, sewage treatment system, on-site back-up power system, and accommodation facilities.	Feb 2021	March 2040	19 Years	
23	Rehabilitating the site progressively.	June 2025	June 2040	15 Years	
	Decommissioning (i.e., Active Closure, 3 years January 2039 to December 2041)				

Magino Project Schedule of All Activities for All Project Phases – EA Condition 9.2					
Activity		Commencement Date (Month, Year)	Completion Date (Month, Year)	Duration	Relevant Notes
#	Description				
24	Removing project components that support ore extraction, processing and transport.	Feb 2038	Dec 2041		
25	Draining of tailings water to the open pit.	Jan 2041	Dec 2083		
26	Removing of discharge and piping systems in the tailings management facility.	Jan 2039	Dec 2041		
27	Grading of surfaces and placement of overburden and soil on portions of the tailings and mine rock management facilities, followed by selective seeding to initiate revegetation.	May 2039	Oct 2041		
28	Constructing wildlife access ramps on the tailings and mine rock management facilities.	May 2039	Dec 2040		
29	Revegetating the project footprint.	May 2039	Oct 2041		
	Abandonment (50 years, including 7 years of Active Monitoring (in addition to Active Monitoring undertaken during Decommissioning) followed by Passive Abandonment January 2042 to December 2091)				
30	Monitoring of environmental conditions (e.g. water quality in water quality control pond, seepage collection ponds and open pit) to determine when direct release to the surrounding environment would be acceptable.	Jan 2024	Dec 2083		These are expected to occur continually throughout operations and pit flooding
31	Monitoring of success of site rehabilitation plan.	May 2036 [SEE #23]	Dec 2080 [for monitoring of pit filling]		Same – some monitoring of progressive

Activity		Commencement Date (Month, Year)	Completion Date (Month, Year)	Duration	Relevant Notes
#	Description				
					reclamation through operations as well
32	Maintaining of the water quality control pond to receive drainage from the tailings and mine rock management facilities in perpetuity.	Jan 2024	Dec 2041		To be maintained throughout operations and closure
33	Filling the open pit through natural runoff and groundwater flows. Natural filling would be supplemented with pumped water from Goudreau Lake at the same rate as freshwater taking during operations (1680 cubic metres per day). This would take approximately 43 years.	Jan 2037	Dec 2080		
34	Connecting of the open pit lake with Goudreau Lake, upon demonstration that open pit lake water quality monitoring is suitable for discharge.	June 2080	June 2081
